Dr. R. Kirk,  
John Curtin School of Medical Research,  
A.N.U.,  
P.O. Box 334,  
Canberra City,  
A.C.T. 2601.

Dear Dr. Kirk,

We hope to go to Cundeelee Mission about the end of this month to collect blood samples. Would you be interested in obtaining serum and clots and if so what would be the minimum volumes required.

I have not been able to find out any more information about the people who have the new variant you detected in our other batch of samples. I shall write again to see if this can be obtained.

Yours sincerely,

Robert A. Cross
