Dr. R.L. Kirk,  
The John Curtin School of Medical Research,  
The Australian National University,  
Human Genetics Group,  
Box 334,  
CANBERRA, A.C.T.

15th April, 1970.

Dear Dr. Kirk,

As you may have gathered from my comments on the results of the project on the Aborigines' chromosomes, it appears unlikely at this stage that it will be of further interest to extend the study beyond the year for which the grant was initially provided. So I am now considering plans for after August when the grant expires.

Professor White will be driving up to Canberra for the Academy of Sciences meeting early in May and has suggested it may be a good opportunity for me to discuss the possibility of future openings both with you and Professor Walsh, who I gather will also be attending the meeting.

Therefore I was wondering if you will be in Canberra on either Wednesday 29th April, Thursday 30th April or Friday 1st May, and if so could I come and discuss this with you and also take the opportunity to discuss the results of my project so far.

Yours sincerely,

Roslyn Angell
