

Peter Morris

October 26, 1970

Dr. Peter Morris, Director  
Tissue Transplantation Laboratories  
Department of Surgery  
Royal Melbourne Hospital  
Victoria 3050  
AUSTRALIA

Dear Peter:

I was most interested to learn that plans are moving ahead for the next International Histocompatibility Workshop.

We will be very happy to assist with the enzyme typing, and if you can supply portions of serum to include some serum protein typing as well. Tentatively, I suggest that we will carry out the tests shown on the attached sheet.

Keep me informed on future developments.

With all good wishes.

Yours sincerely,

R. L. Kirk  
Professor of Zoology

Enclosure

## Serum Protein Groups

Haptoglobin (Hp)

Transferrin (Tf)

Group Specific Component (Gc)

Albumin (Al)

Ceruloplasmin (Cp)

C<sub>3</sub> Complement Component

## Enzyme Groups

Red cell acid phosphatase (PHs)

6-Phosphogluconate dehydrogenase (6-PGD)

Phospho-glucomutase (PGM)

Adenylate kinase (AK)

Lactate dehydrogenase (LDH)

Malate dehydrogenase (MDH)

Peptidase (Pep A and B)

Phosphohexose isomerase (PHI)

Adenosine deaminase (ADA)

Phosphoglycerate Kinase (PGK)

Glucose-6-Phosphate dehydrogenase (G-6-PD)
